

DID YOU KNOW?

95% of facility cleanliness complaints are restroom-related

50% of cleaning complaints are odor-related

3% Only 3% of restrooms have a consistent air freshener replacement program

50% The happiest employees are 50% more motivated & productive at work

Your company has worked hard to develop new rigorous cleaning programs to ensure customers and users that your facility is clean and now it is time to re-open.

So how do you make sure your efforts don't go unnoticed? You need a clean they can see AND smell because once cleaning products dry, that fresh, clean smell disappears, and users are left wondering.

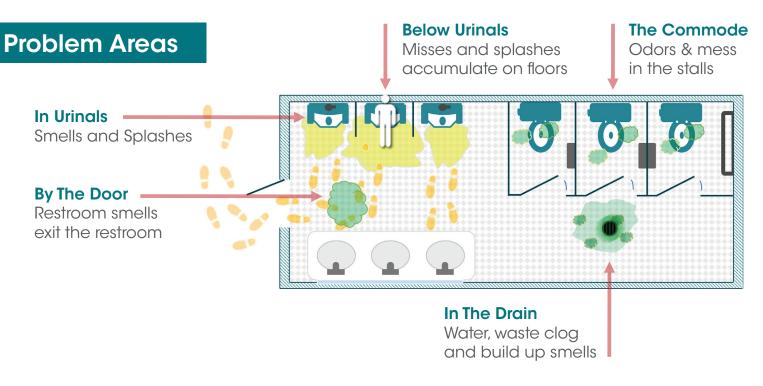

With Fresh it's as easy as 1,2,3.

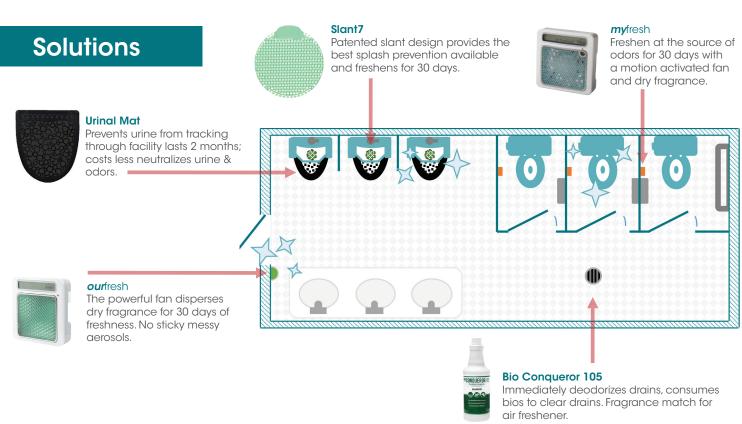

- Clean all areas and surfaces to kill germs and create a clean environment
- 2. Use products that prevent the spread of germs to maintain the clean
- 3. Add air care that freshens and assures users it is clean

Many of Fresh's product designs prevent the spread of germs and freshen the air consistently, for 30 days or longer.

Here are a few examples:

Don't let your hard work go to waste. Use Fresh Products to ensure your facility always smells clean.
