The Modern Solution to Metered Aerosol

Why buy a product
that **only works**

20%
of the time

THE MODERN SOLUTION

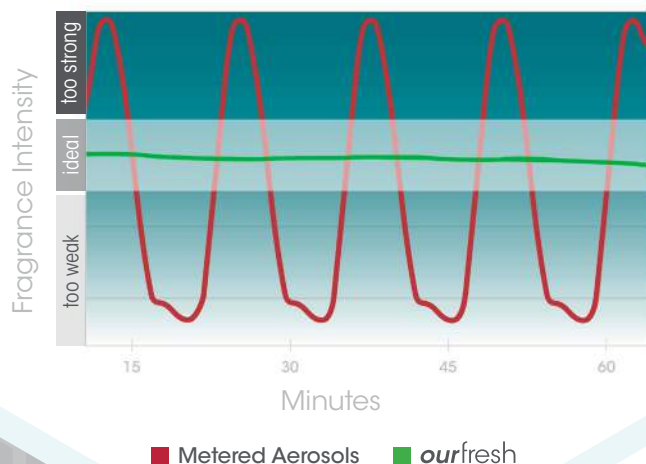

To Metered Aerosols

Metered aerosol has been around forever, and it shows. They are clunky, messy and bad for the environment. Metered aerosols only provide an 'ideal' experience about 20% of the time. If a user walks in right after it sprays, it's overwhelmingly strong. If they walk in 5 minutes after it sprays, it can't be detected. There is a very small window when it's just right, so why pay for a product that only works part of the time?

ourfresh dispensers and refills have been strategically designed to provide premium performance. That means users have a great experience every time because of its consistent dry fragrance release.

ourfresh vs. Metered Aerosols

Hourly Fragrance Release

Premium Performance

- People's perception of how strong or weak a fragrance is, determines their experience
- **ourfresh** is consistently in the 'ideal' range
- Metered only hits the 'ideal' range about 20% of the time

THE EASY SOLUTION

To Install & Refill

ourfresh should be mounted about 6 feet from the floor in the center of the space so there's no ladder required to install or refill the dispenser. 6 feet is more at head level where fragrance is best detected and not at the door. Metered is always placed near the door so people can smell it when they enter and leave, but what about while they are in the room? Isn't that typically where fragrance is needed most?

ourfresh

The 30-day room air freshener

THE SMART SOLUTION

Why ourfresh

ourfresh has been carefully engineered to deliver the perfect amount of fragrance each day for 30 days without that 3-4 week drop off. There are audio and visual indicators that activate when it's time to replace the battery and refill, so you don't have to remember. **ourfresh** is also efficient, it only works when the lights are on so there's no wasted fragrance and the refills are eco-friendly.

Better air care results in better experiences for you, your employees and your customers. Fresh Products believes in making products that perform, are simple to use and make life easier.

**Better Air Care
Better Experiences**

THE GREEN SOLUTION

Eco-Friendly Refills

ourfresh refills are a dry fragrance so its light weight and stays in the air to fill the room. They are 100% recyclable and contain a biodegradable additive. Metered aerosol fragrance starts strong and dissipates quickly. They contain propellants and acetone that leaves residue, damages floors and are extremely flammable.
